RE: Energy Resources Inc.
In-Situ Uranium Mining

Dear Mr. Feight:

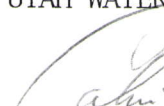

We have met several times with Energy Resources concerning a proposal for an experimental in-situ uranium mining test on Black Mesa near Blanding. However, they are now requesting a construction permit from the Water Pollution Committee for a pilot scale operation at the same location.

It appears that the proposed operation is of a size and nature that your involvement may be advisable. The Water Pollution Committee will be meeting to act on the request for a construction permit on Wednesday, June 27, 1979, at 2:00 p.m. in room 251 of the Department of Social Services Building, 150 West North Temple. A copy of the agenda is enclosed. Also enclosed for your information are copies of minutes of the two previous Committee meetings concerning this proposal.

We invite you to be in attendance at this meeting and to make comments if you wish. If you have questions about this, I will be happy to discuss them with you before the 27th.

Yours very truly,

UTAH WATER POLLUTION COMMITTEE

Calvin K. Sudweeks
Executive Secretary
